

# SB Series

## Edge protection

### Highly Sustainable

Made from recycled materials and is 100% recyclable

### Cost-effective Solution

Optimizes performance at a lower cost than traditional laminated products

### Application Versatility

Can be used for edge protection, unitization and stabilization

### Reliable Performance

Protects products throughout the transportation cycle

# SB Series Edge protection

SB Series edge protection protects, stabilizes and unitizes loads for safe handling, transportation and storage. From carton reinforcement to load stability and containment, SB Series edge protection delivers superior strength, while maximizing efficiency for logistic applications.

## Features and benefits

### ■ Maximum versatility

Ideal for a wide range of products and applications, SB Series is the perfect solution to reducing overall packaging costs per load for a wide range of agriculture, commercial and industrial markets and goods.

### ■ Protects single carton shipments

Used for carton reinforcement, SB Series provides dock-to-door protection, making it a cost-effective, reliable solution for e-commerce.

### ■ Reduces costs

With an innovative double-wrap construction, SB Series edge protection optimizes performance at a lower cost than traditional laminated products. Its lightweight design allows for more pieces per truckload to reduce overall consumable freight costs.

### ■ Application-specific solutions

SB Series edge protection can be tailored to suit different product applications, including custom printing, allowing for branding, product identification and point-of-sale merchandising.

## SB Series Technical Specifications

Traditional Board	SB Series
2 x 2 x .160 in	SB 2200 x .160 in SB 2200 x .140 in
2.5 x 2.5 x .160 in	SB 2500 x .160 in SB 2500 x .140 in
3 x 3 x .160 in	SB 3300 x .160 in SB 3300 x .140 in
