

# 2XL Tape™

Twice as much tape on the same size roll

With 2XL Tape, you get twice as much high-quality Signode tape on a conventional-size hand application roll. We wind our high-performance acrylic and hot melt rubber tapes on a smaller core, giving you the same amount of tape on fewer rolls. The result is fewer cartons of tape to ship, store and dispose of.

## Benefits

- Reduced shipping costs with fewer cartons.
- 100-200% greater warehouse capacity than with conventional hand rolls.
- 40-50% less packaging waste with fewer cartons, pallets, etc.
- Saves time with fewer roll changes.

*The uniquely balanced 2XL Tape applicator with its adjustable 1-1/2" mandrel, makes tape application easy.*

Tape	Backing Material		Standard Roll Length	Standard Roll Width	Color	Adhesive Type	Total Thickness	Tensile Strength	Peel Adhesion <sup>1</sup>	Elongation At Break	Temperature Range
	Grade										
			Yards (m)	Inches (mm)			Mils	Lbs./in. width	Ozs./in. width	%	F°
<b>246 CR</b>	B.O.P.P <sup>2</sup>	Manually applied	220 (201)	1.89 (48)	Clear	Rubber	1.6	24	28	90-100	Application +45° to +120° Storage -20° to +140°
<b>246 CA</b>	B.O.P.P	Manually applied	220 (201)	1.89 (48)	Clear	Acrylic	1.65	24	17	90-100	Application +35° to +140° Storage -40° to +150°

1. Adhesion to steel industry test. Not necessarily indicative of performance of tape on fiberboard.  
2. Biaxially-oriented polypropylene

NOTE: Signode tape is manufactured to conform to UPS, Parcel Post, Motor Freight classification Rule 222, Air Freight and FDA requirements for indirect food contact.
