Signode is committed to being a leader in sustainability for the packaging industry. We have implemented various innovative programs aimed at protecting our natural resources while helping your business grow.

Reduce
- Our ongoing development of higher strength, lower weight strapping has reduced raw material requirements.
- We continuously evaluate new methods to reduce all of our industrial packaging materials as well as identify opportunities to reuse and recycle these materials.

Reuse
- Our strap reclamation program, aimed at limiting waste, collects our customers’ used green PET strapping for use in the manufacture of new strapping.
- We have introduced waste management programs at all of our facilities, diverting on average more than 3 million pounds annually of fiber, metal, plastic and glass from U.S. landfills.

Recycle
- The Signode Plastic Recycling Group operates a PET recycling facility providing raw materials to all of our manufacturing locations.
- As a result of our recycling operation, Signode Tenax® strapping contains more than 85% recycled content.

Helping our customers reduce their packaging waste and disposal costs

**Signode’s innovative Closed Loop Recycling Program** enables companies to recycle used polyester strapping to reduce their packaging waste and disposal costs. It’s an easy, practical and economical way for businesses to fulfill their environmental safeguarding objectives.

---

**Recycle your strap in 3 easy steps**

**Step 1**
Chop used straps into short pieces 1/4" - 3" long. Only 100% green PET strapping will be accepted.

**Step 2**
Place chopped strap in a Gaylord box with a lid. Container must be free of all other materials or contaminants.

**Step 3**
Contact Signode for a PO. Secure container for shipment and ship to the address below. Shipper must pay freight to collection point.
