

CARETEX

Flour Liners

FDA Approved

Made of food grade PE film under ISO 22000 Food Safety and HALAL certified hygiene conditions

Enables Flowability

The Built-in floor fluidization helps to aerate and move the flour during unloading

Moisture Control

Built-in food grade moisture absorbent desiccant - prevents container rain

Contamination Prevention

No interference by human hands or any operator assistance needed

CARETEX

Flour Liners

Do you have following customers or facing following issues:

- High volume Flour Customers consuming more than 20MT of flour per day?
- Concerned about the environment and wanting to avoid having to dispose of 800 pcs. of 25KG bags or 24 pcs. of 800KG FIBCs for supply of 20MT of flour?
- Wanting to save on number of operators having to handle, slit or open bags of flour?
- Eliminate the contamination risk from having to slit or open bags of flour?
- Save the packaging, warehousing and handling of bags of flour?
- No pilfering or stealing of bags of flour?
- Safe and Secure handling of Flour with minimum operator interference?

If so, you need to carefully consider our patented Caretex FLOUR Liners!!!

The COVID-19 pandemic has necessitated stricter norms in handling materials, especially in the edible products category. The flour industry and vital baking and noodles companies have enforced a particularly stringent COVID preventive measures. This has recently led to a spiked interest and increased purchase of our patented Caretex FLOUR Liners in Southeast Asia.

This increased liner sale is a result of more than 15 years of development work by Caretex. We have already supplied our Caretex FLOUR Liners to numerous countries such as Australia, New Zealand, Singapore, Vietnam, Sri Lanka and Indonesia with liner receipt in same countries in addition to Korea, Thailand and Papua New Guinea.

Our patented Caretex FLOUR Liner can easily be loaded through already available Silo truck and unloaded by tilting platform or on-truck tipping chassis. The flour can then be blown into silo or directly conveyed into the ongoing production line without interference by human hands. No operator assistance is needed.

The unique features of our patented Caretex FLOUR Liner paving the way for bulk transport of this product are following:

- In-built Full Floor Fluidization, which aerates difficult flowable products like flour enabling its mobility.
- Possibility to equip with internal Food Grade Desiccant to absorb excessive moisture building up inside the liner from prolonged storage or transportation from hot/humid to cold/ dry climate changes.
- Caretex's Food-Grade container liners have helped safely transport dry bulk products like petrochemicals, minerals, and grains for over 30 years. We have our own fully managed and with 100% ownership liner manufacturing plants in Thailand and India.
