

Angleboard[®]

Recycled paper edge protection

Optimizes packaging

High-strength products help to protect, unitize and stabilize.

Several sources of supply

Manufacturing facilities throughout Europe for reliable product timelines and delivery.

Highly sustainable

Made from recycled materials and are 100% recyclable.

Market versatility

Diverse product line provides solutions for all types of applications and environments.

ANGLEBOARD

Recycled paper edge protection

Angleboard edge protection protects product edges, unitizes, stabilizes and increases the stacking strength of palletized goods, allowing customers to protect their products, while reducing packaging materials and consumable costs.

Features and Benefits

■ Sustainable

Angleboard products are made from recycled materials and are 100% recyclable, helping to minimize any environmental impact.

■ Application-specific solutions

Angleboard products can be sized to fit any load or product, making them ideal for a number of applications that require internal or external support.

■ Enhances protection

Angleboard products enable higher strap tension for tighter, more secure loads. Plus, they have a smooth interior and exterior to help prevent surface scratches.

Angleboard products

Made of multiple plies of recycled paper encased in a full outer wrap, provides superior edge protection and pallet guarding, unitization, load stability, beam strength and stacking strength.

- Repels and absorbs corner damage.
- Enhances the stacking strength of palletized goods.
- Reduces product damage.

Technical Specifications

A Leg Length One	Available from 25 mm – 80 mm
B Leg Length Two	Available from 25 mm – 80 mm
C Caliper	Available from 2 mm – 8 mm
D Length	Available from 50 mm – 6000 mm
