

Slipsheets

Paper and Plastic Slipsheets

Reusable and recyclable slipsheets

Minimizes costs

Reduces transportation weight and costs.

Optimizes space

Compact design allows for more product in less space.

Highly sustainable

Made with recycled materials and 100% recyclable.

Reusable products

Reusable to keep consumable costs down.

SLIPSHEETS

Reusable and recyclable slipsheets

Paper and Plastic Slipsheets offer a durable, space saving, transport packaging solution. An excellent alternative to wood pallets.

Plastic Slipsheets

Plastic slipsheets, the storage and shipping choice of many industries, increase product stabilization and reduce load migration, while meeting unitized load parameters. An economical alternative to other shipping applications, they reduce transportation weight and cost, while allowing for more product in less space.

Paper Slipsheets

Our paper slipsheets are made from 100% paper. We can also provide these sheets with a PE coating so that they are moisture-resistant. Paper slipsheets can also be used as separator on a pallet. Furthermore, we can provide the slipsheets with flaps (crease), making them easy to grab for a push pull system.

Features and Benefits

■ Sustainable product

Plastic slipsheets are a highly sustainable option made from a blend of recycled and virgin resins.

■ Minimizes contamination concerns

Unlike wooden pallets and fiber slipsheets, plastic slipsheets resist moisture and bacteria, while mitigating rodent and insect damage.

■ Maximizes versatility

Die cut to product specifications, plastic slipsheets are ideal for the food and beverage industry as well as the retail, electronics and home improvement.
