LayerPadPlus+ High performance plastic layer pads

Durable

Proven multi-trip use up to 100 trips with no wear. Fully recycled and recyclable product.

Economical

High tear resistance, easy to collect, stack, clean and re-use. Product branding possible.

Flexible

Hygienic odourless and non-staining. Use at different customers and segments.

Higher Outputs

Reduces the loss of units due to can fall over. Anti-slip surface for improved stability.

transport

Signode's LayerPadPlus+ separator sheets offer maximum load stability, reduced contamination and greater product protection. They significantly reduce flavor migration and are moisture, bacteria and chemical resistant. Available in multiple gauges to suit different product applications, they are ideal for a wide range of industries, including those making food and beverage cans, aerosols and glass containers.

Features and benefits

Complies with ASTM standards

- Coefficient of Friction: ASTM D1894-01
- Impact Resistance: ASTM D 5240-98A
- Tensile: ASTM 638-02a
- Tear Resistance: ASTM 1004-07

Cost effective

- Superior elasticity for consistent, repeated performance
- Reusable up to 100 times offering a far greater return on investment
- TCO lower than paper as higher multi-use and easy recyclability
- Textured sheet finish improves load stability & load build

Environmental

- Recycled and recyclable for circular economy
- Washable so simple to re-use
- Non-hygroscopic, non-stainable and odourless
- Bacteria, moisture and rot proof
- Multi-trip use so reduced CO2
- Almost indefinite shelf life with correct storage

Easy to integrate

- Compatible with industry pallets
- Rounded corners
- Anti-static properties
- Higher surface coefficient
- Smooth, flat surface
- Multiple colors
- High density storage of sheets up to 500 per pallet

Complete packaging solution from Signode

- As a total systems supplier we can provide layer pads, pallet top frames, high performance Tenax® PET strapping and Mima® stretch-films in combination with automatic application equipment to our customers on a global basis.

Recapture Program

Plastic layer pads can be fully recycled through Signode's layer pad recapture programme. This allows sorted sheets to be returned for complete recycling in our plant. The volume of waste is reduced as are waste disposal costs, while minimising customers CO2 and also their overall environmental footprint.

Technical Specifications

Layer Pad 150 - 1290	1115 x 1285 x 0,8 mm
Layer Pad 150 - 1415	1115 x 1415 x 0,8 mm
Layer Pad 150 - 1260	1180 x 1259 x 0,8 mm
Layer Pad 150 - 1345	1185 x 1345 x 0,8 mm
Gauge Options	
Medium Duty	1,3 – 1,5 mm
Heavy Duty	2,5 – 4 mm

**Custom sizes available*
