

Jumbo Corner

Edge protection

Increases Productivity

Easy, time-saving application

Application Versatility

Customizable sizes and coatings to meet individual product requirements

Reduces Damage

Prevents product damage during shipping and handling

Highly Sustainable

Manufactured with 100% recycled materials and is 100% recyclable

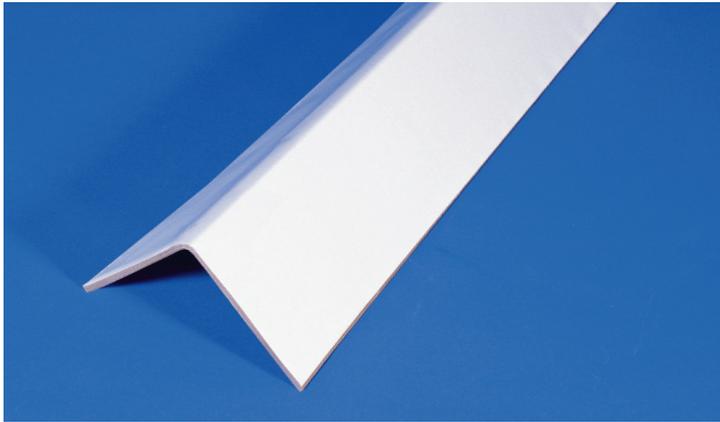

Jumbo Corner

Edge protection

Jumbo Corner edge protection is a laminated paperboard that helps prevent product damage that can occur during shipping and handling. With a preformed 90-degree angle that provides remarkable strength, Jumbo Corner edge protection can be used for a wide range of applications, including corner protection, load stabilization and unitization and to increase stacking strength.

Features and benefits

■ Product versatility

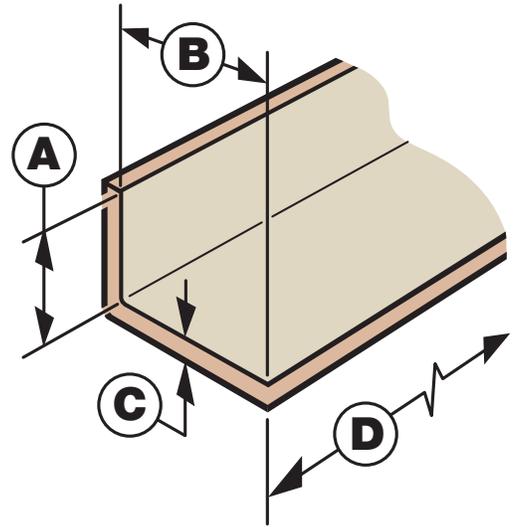

Jumbo Corner edge protection couples exceptional beam strength with a smooth surface and non-abrasive interior, making it safe for the most delicate products and durable enough for the bulkiest.

■ Customized solutions

Available in a standard white clay coat or custom finishes, Jumbo Corner edge protection can also be treated with protective coatings to provide moisture resistance and corrosion protection, maximizing product protection throughout the transportation cycle.

■ Enables product marketing

Jumbo Corner edge protection can be printed, allowing branding, product identification and point-of-sale merchandising.
