## Pallet Wrapping

### Reliable Performance

Superior load protection and containment

### Application Versatility

Machine options with unique wrap patterns for any application

### Highly Sustainable

Environmentally friendly packaging materials that are recyclable

### Lower Total Cost of Ownership

Integrated efficiency features with minimal maintenance requirements

Signode offers a full line of stretch wrapping solutions to bundle and unitize products, providing stability and protection throughout the transportation cycle. From a simple, semiautomatic rotary arm stretch wrapper to a fully automatic system with innovative options to increase productivity, Signode wrapping solutions help improve load integrity and protection, while maximizing cost-efficiency and streamlining operations.

### Products

#### ■ Orbital Stretch Wrapping Equipment<sup>^</sup>

For oversized, irregular-shaped loads, Signode's Yellow Jacket equipment tightly wraps load to pallets, stabilizing them throughout the transportation cycle. All Yellow Jacket equipment incorporates high efficiency features and simplified operation to streamline operations.

**Yellow Jacket**

Designed to tightly bundle and unitize smaller products, Signode's H.Bohl orbital wrapping equipment suits a variety of product applications, while easily accommodating production changes. H. Bohl equipment is designed with productivity and flexibility in mind to ensure the lowest total cost of ownership.

**H. BOHL**

#### ■ Turntable Stretch Wrap Equipment<sup>+</sup>

For stable loads, Signode offers a full range of Raptor machines as well as the GW-1200 to accommodate varying production needs. With both semiautomatic and automatic models, Signode turntable stretch wrappers are reliable, safe and easy to use.

#### ■ Rotary Arm Stretch Wrap Equipment<sup>\*</sup>

Designed for wrapping palletized loads that are unstable, odd-shaped or heavy, Signode's rotary arm wrappers by Cobra and Girotec provide unrivaled versatility, efficiency and superior functionality making them ideal for a variety of applications. Cobra equipment is available in both semiautomatic and automatic models and the Girotec is a semiautomatic machine.

#### ■ Rotary Ring Stretch Wrappers

Ideal for a range of applications including unstable and lightweight products, Octopus equipment incorporates the latest technology with the classic ring-type method of wrapping to provide speed and reliability in wrapping.

**Octopus**

#### ■ Stretch Hood Equipment

Lachenmeier stretch hood equipment provides products protection from the elements, while stabilizing them for transport, ensuring that products make it through the supply chain undamaged. Characterized by simplicity and user-friendliness, Lachenmeier equipment ensures unparalleled load protection from the elements, while providing significant cost-saving benefits.
