

Single Face

Protective wrap

Highly Sustainable

Manufactured with 100% recycled materials and is 100% recyclable

Application Versatility

Can be used for a variety of industrial applications

Economical Alternative

Less expensive than other packaging materials

Maximizes Protection

Ideal for both cushioning and wrapping

Single Face Protective wrap

Single Face corrugated paper, used for both wrapping and cushioning, helps protect products from damage during the transportation cycle. Its unique fluted design provides extra cushioning and shock protection, making it ideal for a range of applications.

Features and benefits

■ Simplifies application

Easy to roll out and conform to any shape, Single Face efficiently protects products, while reducing packaging time.

■ Lowers packaging costs

Manufactured from recycled corrugated paper, Single Face is a durable, cost-effective alternative to packaging films and foams. Single Face, available in A flute and B flute, provides product protection, while minimizing costs and waste.

■ Application flexibility

Used for different industrial wrapping and cushioning applications, Single Face delivers superior shock absorption and crush resistance for anything from millwork to glass and bottles.

Single Face Technical Specifications

Single Face sizes are based on the following dimensions

Flute size	3.1 or 4.8 mm (1/8 in or 3/16 in)
Available in different strengths	18/18, 26/26, 33/26, 42/26
Width	76 – 2132 mm (3-84 in)
Sheet size	Length: 305 – 1524 mm (12-60 in) Width: 51 – 1510 mm (2-59.5 in)
