

# Printing Solutions

## Printing Solutions Lumber marking

### Minimizes Downtime

Integrates seamlessly into your operation

### Improves Productivity

High-speed printing for increased throughput

### Printing Accuracy

Maximum resolution with precise placement

### Simplifies Operation

Features an advanced HMI for easy set-up and operation

# Printing Solutions Lumber marking

Signode's direct-to-product and label printing solutions for lumber marking deliver high-speed printing for a variety of applications within the forestry industry. Designed to accommodate variable printing requirements, Signode's printing solutions couple high resolution quality with precise placement to streamline lumber marking for any operation.

## Features and benefits

### ■ Integrates seamlessly into production

Designed for variable production environments, Signode's printing solutions require minimal set-up for easy integration into any production line. Capable of printing variable data in different colors and sizes, including alphanumerics, logos and barcodes, Signode's printing solutions allow for quick adjustments to changing production needs. Equipment modularity enables both face and end printing abilities.

### ■ Lower cost of ownership

Unlike other printing methods, Signode's printing solutions utilize the most advanced printing technology, providing better performance, simplified operation and lower costs.

### ■ Simple to operate and maintain

Signode's printing solutions feature PLC-based systems, providing simplified operation and maintenance. They allow for fast and easy adjustment to printing messages and parameters. Plus, fully enclosed mechanical systems streamline maintenance.

## Additional standard features

- Vision system
- Auxiliary heads
- Auto height
- Heating package

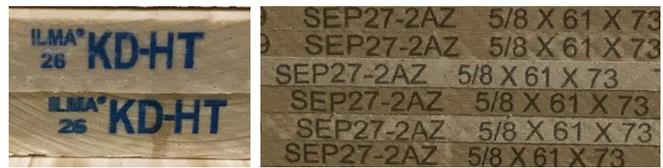

## Optional equipment

- Tally station
- 2D lumber tracking system and tags generation
- Labels and tags design
- Automated stenciling system
