

# MIMA<sup>®</sup> HOOD

## Stretch hoods

### Full system solution

Designed to be the perfect match with our Lachenmeier automatic stretch hooders.

### Premium quality

Highest quality grade raw material and 40+ years of knowledge in manufacturing polymers.

### Cost efficient

Streamline your operations with a no surprises cost per pallet

### Available with PCR

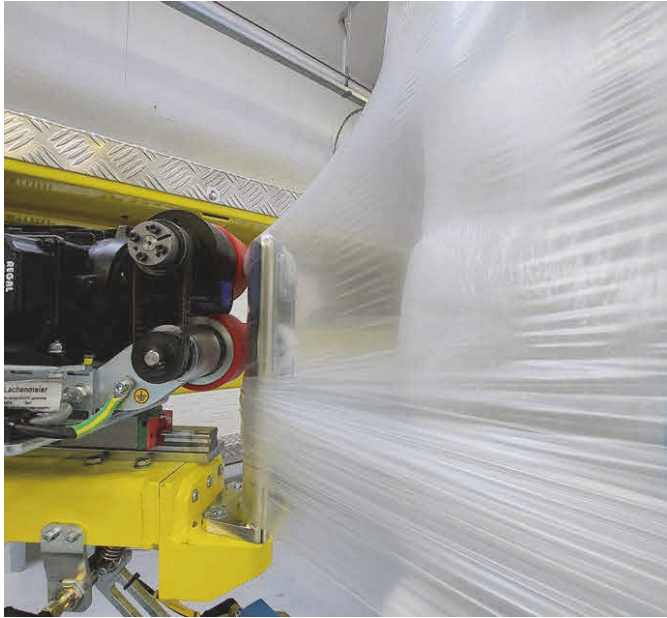

Contribute to meet your sustainability goals with the same performance.

# MIMA® HOOD

## Stretch hoods

Our state of the art stretch hoods, made of 100% LLDPE (Linear Low Density Polyethylene). Primarily designed for our Lachenmeier stretch hooders but also compatible with most stretch hoods systems.

## Features and benefits

### ■ Designed for LACHENMEIER stretch hooders

We engineered MIMA HOOD to be the perfect match with our field proven, high performance Lachenmeier stretch hooding machines, turning your pallet wrapping into a full system, simplified and reliable process.

### ■ Exceptional quality, European made

40+ years of experience in producing stretch and oriented films, designed and manufactured in our Virton plant in Belgium with the highest resins quality grade. No compromise on quality for peace of mind and optimal outcome.

### ■ Streamlined wrapping costs

Tight tolerances and reproducible cost per pallet due to machine / consumable optimization. One supplier, one system, high performance.

### ■ Available with PCR content

MIMA HOOD is available on request with 35% PCR content, helping you meet your sustainability goals without compromising on performance.

## Technical Specifications

Color	Transparent, Semi transparent
Thickness (μ)	50 - 140
Width (mm)	Custom made
Gussets	Custom made
Length (m)	Custom made
Roll diameter (mm)	790
PCR content	<b>Up to 35%, on request</b>
UV treatment	Yes, optional

For optimal results, we recommend pairing MIMA HOOD with our LACHENMEIER automatic stretch hooders.
