

Forklift Inflator

Mobile Air Series

Higher Productivity

Increases productivity with minimal downtime

User Flexibility

Easy mobile operation, for maximum flexibility

Increased Mobility

No recharging, powered by the forklift battery

Streamlined Operations

Eliminates long air lines, air carts, or compressors — reducing dock congestion

Forklift Inflator Mobile Air Series

The Forklift Inflator is easily installed on any forklift and is powered by the forklift battery. Once installed, simply flip the switch to fill dunnage airbags anywhere inside a trailer or container.

This inflation technology significantly decreases loading time and allows you to be as mobile as ever. No more dragging long air lines across the loading dock and connecting / disconnecting dunnage bag inflators.

Features and benefits

- True mobility**
 Powered by the forklift battery, the Forklift Inflator moves with the operator, allowing air bags to be inflated anywhere in the trailer or container without restriction.
- Streamlines loading operations**
 No need for long air lines, air carts, or compressors — reducing dock congestion and speeding up loading processes.
- Simple, efficient operation**
 Operators can inflate dunnage airbags instantly using an easy-reach on/off switch.
- No downtime or recharging**
 Continuous operation without separate batteries, recharge cycles, or compressed air systems.
- Easy to install attachment bar**
 The inflator can easily be mounted to forklifts. The mounted inflator includes a storage bracket for the air hose.

Forklift Inflator Technical Specifications

Max Pressure	1.5 PSI
Hose Length	15 ft
Weight	7.5 lbs
Part Number	MA1000

For use on these airbags

Optional Accessories

Electric convertor

Converters make it possible to use forklift airbag inflators on electric forklifts, expanding their application across different power systems.

Universal bracket

The universal inflator bracket is designed for forklifts with obstructions that prevent installation of the supplied mounting bracket.
