

Coil Edge Protection

Coil Edge protection

Highly Sustainable

100% recyclable HDPE

Application Versatility

Can be used to protect both inside and outside diameter of your coil/roll

Reduces Damage

Safeguards coil edges from handling equipment

Increases Productivity

Easy, time-saving application

Coil Edge protection

Edge protection is designed specifically for steel coil edges or any other coil in the metal industry, help to prevent product damage that can occur from the rigors of handling.

Features and benefits

Streamlines application

Easy to install and position. Edge protection feature overlapping layers that provide 100% coverage on the inner edges, preventing damage from strapping and material handling equipment. It is notched and scored to conform to the circumference of the roll, eliminating special handling to keep them in position.

Reduces expenses

Edge protection is made of high quality HDPE and is 100% recyclable. It has been engineered to simplify disposal and reduce costs by eliminating inventorying and return freight fees.

Application versatility

Edge protection is designed to work on both inside and outside diameters of your coil. It is available in both standard and custom specifications and can be manufactured specific to individual product requirements, making them ideal for a wide range of products including those with larger diameters.

* Produced in compliance with EPR Regulatory requirement

Technical Specifications

PRODUCT	Bore Protector (ID)	Edge Protector (OD)
BASE (mm)	100 & 75	75
FLAP (mm)	50	75
Thick (mm)	1.6 to 2	1.00 to 1.3
Length	1650 mm / 1950 mm	400 to 600 (mtr)
Colour	Grey & Black	Grey & Black
