HBX-4300™ Small Anvil

Semiautomatic plastic strapping machine for small bundles

- Unmatched simplicity
  Easy to operate and maintain
- Jam-resistant technology
- Designed to strap small, rigid bundles

Up to 70 straps per minute!

Model is shown with optional features.
The HBX-4300™ Small Anvil semiautomatic strapping machine, designed for small, irregular packages, provides reliable bundling for a wide range of applications. The HBX-4300 Small Anvil can strap rigid packages as small as 2-3/4" wide by 3/4" high. Built with a number of standard features to simplify maintenance and operation, the HBX-4300 maximizes production to save you time and money.

Unmatched simplicity
The HBX-4300's simple yet durable design eliminates the use of drive belts and clutches. This combined with other trouble-free maintenance elements like toolless hot knife removal and jam-resistant technology make it easier to operate and more cost effective to maintain than other strapping machines.

Bi-directional coil loading
Strap coil pays off from either direction, eliminating the downtime and material waste resulting from incorrect coil loading.

Out-of-strap feature
The out-of-strap feature ejects the strap at the end of the coil to eliminate downtime and errors associated with removing the excess strap left in the machine.

Fully accessible strap path
No tools required. Simply raise the tabletop and lift guide for access to strap path.
